Please read the terms and conditions (“T&Cs”) carefully. By making a contribution to stellargold for purchase of Stellargold tokens (“XLMGOLD”) during the token sale, you will be bound by these terms and conditions and all terms incorporated herein by reference.

If you do not agree to our terms and conditions please do not make any contributions to our token sale. Stellargold.inc is a venture of sujith incorporation and is a company incorporated and registered, is referred to in these (“T&Cs”) as Stellargold company.

Decentralized exchanges offers trustless, non-custodial trading and improved transparency in holding and sharing ledgers. Despite these advantages, In the block chain technology the transactions are held with the help of miners which is the core focus for our token. This platform Stellargold helps in educating common people in mining and the methods of mining various coins so that there will be more miners and at the same time the time for each transaction gets reduced and the cost of mining will greatly be reduced. By making a contribution to Stellargold every member will be considered as a legit miner and it will also be used for paying the mining fees for various miners. This coin will be used to pay the mining fees in various trading platforms and online mining sites. (*NOTE: This token will be used as a currency for mining in only genuine mining sites and hence this platform helps in uprooting fakeminers).

1. Losing money on fake miners:

With the increased number of cryptocurrencies and miners it becomes inevitable for people to seek mining sites which usually operates on large scale. And this leads to the indulging of fake mining sites which are cheating people by accepting money as fees and in return giving them a lots of disappointment and set back.

2. Number of minable crypto:

With the increased number of cryptocurrencies that could be mined the number of miners also increased greatly and as a result of which small household CPU/GPU are not proving good to their masters. So it is an essentiality to seek professional miners. While seeking such people are betrayed.

3. Awareness about mining:

Some people who are not well aware of mining are wasting their time and money by using their PC for mining and in return they are fetching nothing except a few electricity charges.

4. Mining the backbone of transactions:

Mining is the heart of cryptocurrencies. Without the process of mining the cryptocurrencies couldn't function. Because all the transactions are done with the help of miners. So it is an important aspect to develop mining so that there will be a lot of miners and consequently there will be less fees for transactions.

BREAKTHROUGH SOLUTION OF STELLARGOLD:

Stellargold(“XLMGOLD”) is an advanced solution to these problems which could allow users access simple, safer and faster transaction methods to various platforms and mining sites. It is an ERC 20token and can be stored in any of the ethereum wallets like mist,metamask,myetherwallet,blockchain wallet etc.,Stellargold provides users with a globally fastest money transaction yet absolutely safe with the lowest fee(based on platform).You can use Stellargold for paying various crypto miners who are considered as legit. It makes a distinguishable factor between the genuine mining sites and fake mining sites. This also provides a key breakthrough in the cryptocurrency field.It is easier for the mining sites to get genuine customers. Hence it brings smile on all. Unlike other digital currencies Stellargold is not only designed to become an digital currency that can meet the highest advanced technology but also become the friendly digital cash and can be easily used by anyone

1. FAST:

One thing making stellargold unique and distinct cryptocurrency is its speed and transaction confirmation takes place within seconds. As ethereum blockchain – takes only up to 3-5 minutes for a transaction with minimum gas fees.

2. Secure:

It is impossible to hack stellargold coin from your wallets unless then you share your secret key with anyone. It is build in such a way that we won't ask for your private keys at any time at any cost.

3. Anonymity:

Hide the transactions while remaining totally anonymous to change. Being decentralized currency transactions will always be anonymous and never be able to tracked by anyone.

4. Instant remittance:

Our experts are working hard to decrease the cost and technicality while increasing the speed of this process with the help of technology and some great igniting servers.

5. Transparency:

The flow of the transactions is very simple. So if there is any invalid (or) fake details are provided the high level of transparency of this decentralized currency can easily identify the theft.

6. Recognition at universal level:

Stellargold("XLMGOLD") is not bound by exchange rates or transaction charges. So that it can be used across the globe without any issue.

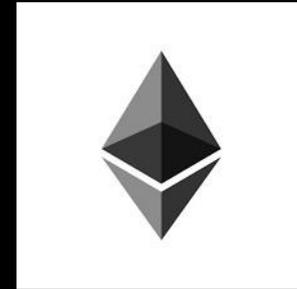

7. No downtime as supported by top decentralized platform:

Unlike other cryptocurrencies Stellargold is based on a single blockchain. It is based on ethereum blockchain. So that it is easier for everyone to hold such tokens. Hence it can be easily stored in any wallets and being decentralized there can be no virus attacks can cause any downtime.

Wallets supporting Stellargold:

Stellargold can be stored across any ERC20 wallets.

- Mist wallet
- Myetherwallet
- Metamask
- Parity
- Trust
- Trezor/Ledger Nano

Motives of Stellargold coin:

- To become the only currency for paying crypto miners by 2020.
- Help everyone mine cryptocurrency.
- Complete guides on mining all minable crypto-currencies.
- Security from fake equi-hash cloud miners.
- Increasing the total number of crypto-miners.
- Reducing the gas fees to zero.
- Setting up of own crypto-mining farms in more than 10 centers by 2020.

1. What happens if the number of miners increases??

When the number of miners increases the rate of finding blocks could be lowered and hence the transactions could take at a faster rate and hence the cost per transactions will greatly be reduced.

2. Which mining sites will accept stellargold?

Those mining sites which are genuine and undergone testing by the stellargold team will accept stellargold as their fee for mining. Initially after the ICO ends the name of those mining sites will be published and after that you can start you mining various cryptocurrencies using stellargold. Then stellargold becomes the backbone for all other cryptocurrency.

3. When will stellargold mining farms will be created??

The prototypes for setting up of a mining farm is already under progress and soon crypto-currency mining farms will be set up all over the world to mine all cryptocurrencies that are minable.

4. What happens if mining is stopped??

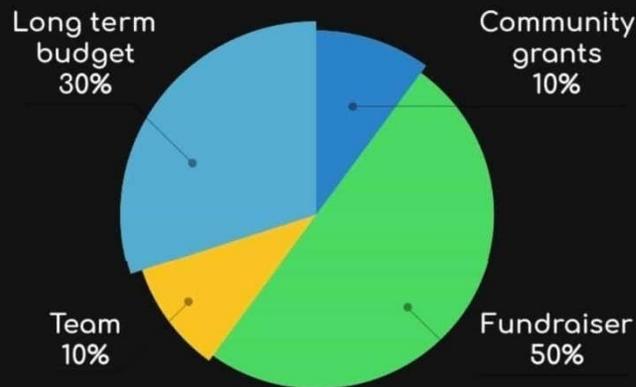

Mining is the backbone for transactions in crypto world. Without mining no currency can function. So stellargold can also be called as functionality crypto and Unless there is crypto there should be mining.

2nd phase - 2,00,00,000

50,00,000 Tokens will be sold out through
coinexmarket.io and the others through
smart contract.

Airdrop

As a part of promotion a total of 10,00,000 coins will be airdropped to the first 10,000 members who registered on our website during the airdrop period. A total of 5,00,000 coins will be used for referral campaign. A person will receive 10 tokens for registering and 50 tokens for referring a friend. However one can refer as many as he can before the 5,00,000 tokens get exhausted. The persons who received the token during airdrop through referral campaign will have to complete the KYC to receive their tokens after the pre-sale ends on June 5, 2018 and any suspicious activity noted as misusing this campaign may result in banning of your account permanently. The airdropped tokens will be distributed after Pre-Sale and can be traded in exchanges after 1st phase of ICO

The referral program of stellargold is unique to ensure genuine referrals and to avoid fake people from damaging our customs. So each member who wants to refer a person has to apply for their referral candidate program and once they got an verification mail from our team and a 12 digit referrer code with which they can participate and each verified member can refer up to 10 members(500 tokens worth \$250). Yet they can still add referrals under their name but they will not be rewarded with stellargold instead they will receive the top referrer prize which is a cash payment of \$1000 paid to their paypal account after the end of ICO.

- The referrer must be above 18 years of age and own a PayPal account (To receive the winning amount).
- The referrer must have applied for the airdrop.
- The referrer must have to show the details of his marketing at the end of campaign (like where he posted his unique code Eg: Youtube channel, Facebook page, Email marketing etc).
- He/She should promise that they would not indulge in fake referrals and involve in Using VPN, Hotspots and other methods to cheat us as our referral program is completely manual due to issues the current ICO offerings are facing.
- We promise that once you applied for the referral program the application will be reviewed and answered within 24 hours.
- The Company has all the rights to ban a member from the ICO if he was found to access his account from various IP addresses (*If the reason is valid then it could be lifted within 24 hours).
- Please join the campaign if you accept all the terms and conditions.

➤ Timing??

Stellargold reserves the right to modify the start and end date(s) of the Program at any time, at our sole discretion. We also reserve the right to modify or cancel the Program at any time, at our sole discretion.
